

Экспорт из национального архива НЛО Украины - [UFOBUA](#)

Фильтр экспорта - уникальный номер (836-F)

Дата экспорта: 03/07/2024

Идентификатор: 836

Область: Закарпатская

Дата события: 21.05.2012

Категория: Пролет НЛО

Форма НЛО: треугольная

Описание: I just saw ~42 black triangle rotating objects, and 2 white, 1 blue, 1 green lights. There was red glowing fireballs, they ejected some red light streams into the clouds and then black triangle objects changed their form and transform into some boomerang shaped objects with lights. One of black objects was above me (~100 meters), he floating very slowly, rotating and blinking, he didn't make any sounds. Then I saw rest of objects. I observed this event about 2-3 hours and they seemed they were like living creatures not just machines (but this is just mine opinion) I was in my yard when this happened. I just looked up and saw some red fireball and then this fireball started to move, after that i saw some black triangles, they moving slowly. One green fireball appear and gone in a few seconds later, same happened with blue fireball, and there were some white lights they just blinking and moving around black objects but not very long time.
